Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner informed applicant that the application was being searched for allowance. The examiner suggested the applicant to correct 101 issues in claims 55-60. The applicant agreed with examiners suggestion to preclude claims 55-60 from being directed to carrier waves and signals by amending "computer readable storage medium" to "computer readable non-transitory medium". The applicant authorized the examiner changes in an examiners amendment once the application was in condition for allowance. .
